GENERAL GUIDE OF THE COURSE

The MOOC Course ***The European Union as an agent for change*** is the second of the two MOOC courses that will be developed during the period of execution of the CITIZEU European Project “*The impact of Euroscepticism in the construction of Europe*” (Program Europe for Citizens).

In it we will tackle different challenges that the European Union faces at this moment. We want to encourage debate about many issues on whose answer our future depends: the possible ways of solving the current conflicts, what the EU contributes and what should contribute to the lives of its citizens, its own future viability and other similar ones, are several on which we will reflect together, to try to create a better Europe to live in.

The idea is that in a relaxed tone, suitable for all audiences, you approach Europe and the European Union, providing you with basic knowledge that will give you a critical and proactive awareness to form an opinion of the EU, either for or in favor of against, because it is the lack of necessary knowledge (among others) which constitutes the embryo of the incipient Euroscepticism that ravages Europe, as there is a clear distancing of citizens with European spheres.

TARGET AUDIENCE

The course is aimed at all those people who have concerns about the world we live in, are willing to investigate the real conditions that the European Union is going through, analyze its problems and provide future solutions. We seek a critical vision that confronts diverse points of view, in order to achieve mutual enrichment.

We do not need any academic requirement, only the desire to build a better future.
